OKI Printer Driver Compatibility

OKI Printer Driver compatibility with Windows 8/Windows 8.1
and Windows Server 2012 / Windows Server 2012 R2

Version: 5

Date: 17 Apr. 2014

Table of Contents

● Supported   ◇ Requires Driver Updater

Introduction

Following the launch of Windows 8/8.1 and Windows Server 2012/2012 R2, please find details of the compatibility of drivers and software applications related to OKI's portfolio of color, mono and dot matrix printers and multifunctional devices.

If your printer or MFP model is not listed, please contact your local OKI support representative.

● **means**: Supported   ◊ **means**: Requires Driver Updater

If there is no ● or ◊ in the box beside the product it means that the driver option is not supported.

● Supported   ◊ Requires Driver Updater

Explanation of Terms

OKI

Built-in Driver
- Refers to the driver included in the Windows 8/8.1 operating system, these
- drivers are also referred to as "in-box drivers" or "in-OS drivers"
- Automatically installs for printers that are on a non-domain network with 30
- devices or less
- Most printers with a built-in driver use the OKI PCL6 Class Driver
- Supports x32, x64 and ARM
- This is the only driver option for Windows RT (ARM processor) tablets
- If Built-in Driver is Supported: The Windows 8 built-in driver at time of purchase
- can be used

Windows Update:
- Automatically installs the driver when the computer has an internet connection

OKI Driver*
- Full feature driver available on the OKI website
- Supports x32 and x64 (**may require Driver Updater)

* There may be some feature limitations with the Windows 7/Vista driver under
   Windows 8 and Windows 8.1 operating system

** Driver Updater (x64 only): This is the update program that allows you to use the
   driver for Windows 7 x64 on Windows 8 x64 and Windows Server 2012.

- Please install the Windows 7 x64 driver first and then run the driver updater
  (available on the website by searching for Utilities and Windows 8 x64).
- Double-click on the downloaded file and if "User Account Control" is displayed; click [Yes].
  Then follow the steps to install the software.

Windows Server 2012 / Windows Server 2012 R2
Windows Server 2012/Windows 2012 R2 only runs on 64-Bit processors, therefore please
refer to the 64bit column only.

● Supported   ◇ Requires Driver Updater

OKI

Note 1:
You may be able to select this model using the Windows 8 and Windows 8.1 built-in driver, however although the driver will appear to have installed, nothing will print. For this reason, the model is displayed as 'Not Supported'.

Note 2:
The Driver Installer is contained in the web package; therefore it cannot be completed by USB installation. To close the Driver Installer window awaiting PnP, you need to click the Cancel button thereafter the PnP.

Note 3:
Printing is disabled from the MPT (Multi-Purpose Tray) in Windows Store apps. To print from MPT, select MPT for Source on the printer's operator panel and then select [Automatically Select] for Source before printing.

Note 4:
Windows 8/ 8.1 64bit/Windows Server 2012/Windows Server 2012 R2: Use the driver for Windows7. Install OKI Driver Updater [0001] after you install the driver for Windows 7.

● Supported　　◇ Requires Driver Updater

Software Applications

OKI

Please find below the scheduled availability of updated software applications.

- No shortcut will be added to the Metro UI at installation unless a file extension is EXE.
- An uninstaller shortcut is not added to the Metro UI.
- No plan to support utilities in Windows RT.

Operating Condition

Note A:
If the "Program Compatibility Assistant" dialog appears upon installation completion (including cancellation of installation), ensure to click [This program has successfully been installed]. When an installer or utility is launched, the [User Account Control] dialog will sometimes appear. Click [Yes] as it is necessary to run an installer or utility with permissions for administrators. With [No] clicked, neither the installer nor utility will launch.

Note B:
A supported version of the printer driver will become necessary.

Note C:
Print does not prompt it to automatically launch.

Note D:
Shortcut will NOT be added automatically at Start Screen when installing. It needs to be added manually.

Note E:
Windows Server 2012 R2: The expansion protected mode of Internet Explorer 11 is ON, so Web page cannot open.

● Supported ◇ Requires Driver Updater

Note when upgrading to Windows 8.1

OKI

1. Windows 7 to Windows 8.1

Printer Driver cannot be kept. (Automatically deleted) (See figure 2)
* Not only Oki but also the competitors will have same situation.

2. Windows 8 to Windows 8.1

If you choose "Keep Windows settings, personal files, and apps", Printer Driver will exist.
(See figure 1)

Figure 1: Win 7 » Win 8 / Win 8 » Win 8.1

Figure 2: Win 7 » Win 8.1

Item	Win 7 » Win 8 / Win 7.1 » Win 8.1	Win 7 » Win 8.1
Keep Windows settings, personal files, and apps	Printer driver exist	N/A
Keep Personal file only	Printer driver deleted	Printer driver deleted
Nothing	Printer driver deleted	Printer driver deleted

● Supported   ◇ Requires Driver Updater
